Science & Community LEAP

Do your interests lie in Biology, Chemistry, Math or Physics
Are you interested in expanding on these majors.
This LEAP class may be for you.

Science and Community LEAP is a four year program, designed for students who are interested in careers in science and technology. The classes are deliberately small intended to foster a learning community and create a student cohort experience. In this program, students will learn about science as a social process and the role humanities and diversity play in a well rounded scientific world view. Science and Community LEAP will help you develop skills in reading, researching, writing, critical thinking, team work, and communicating material orally and persuasively. Through team research projects and close student-instructor interaction, Science and Community LEAP helps students in the College of Science form a supportive cohort that will continue to function as they proceed through their majors.

Fall 2015
Tuesday & Thursday
at 10:45am to 12:05 pm
Stephen Maisch, PhD
Seetha Veeraghanta, PhD
